

Here's a curated set of **30 advanced practice questions** for students learning **advanced ChatGPT prompt engineering** in the domains of **Newspapers, Social Media, Image Building, Media Content Analysis, and PR**.

Each item pushes expert techniques: role prompting, schema-first outputs (JSON/YAML), platform-aware constraints, safety/ethics guardrails, iterative self-critique/red-team loops, multi-persona adaptation, and measurable KPIs.

---

## A) Newspapers & Editorial Workflows

### 1. **Front-Page Feature from Messy Inputs**

Design a prompt that converts raw reporter notes + partial transcript into a **front-page feature** in **AP style**, with SEO headline/subheads, pull-quotes, source attribution, a "what we don't know" box, and a final **bias/hedging language audit**.

### 2. **Multi-Format News Packaging**

Write a prompt that turns a long article into three newsroom formats: **(a)** 90-second anchor script, **(b)** 60-word radio bite, **(c)** 6-tweet thread with verified data points and links. Require a **claims-certainty** label on each fact.

### 3. **Investigative Lead Validation**

Create a prompt that extracts hypotheses from a draft investigative piece, distinguishes **claims vs. evidence vs. speculation**, and outputs a **verification plan** with priority ranking and potential conflicts-of-interest.

### 4. **Editorial Bias & Framing Detection**

Draft a prompt that detects framing devices, loaded language, omissions, and ideological cues in an op-ed, then produces a **balanced rewrite + transparency notes** + counter-quotes placeholders.

### 5. **Headline Generator with Scoring**

Create a prompt to produce 12 headline variants (hard news, analysis, tabloid, SEO, push alert, explainer), then **auto-score** them for clarity, accuracy, searchability, and emotional temperature with a concise justification.

### 6. **Source Reliability Triage**

Design a prompt that evaluates three named sources on **evidence strength, independence, transparency, motive, track record**. Output a comparative table and a **what would upgrade/downgrade** rating section.

---

## B) Social Media Strategy & Publishing

### 1. **Algorithm-Aware Cross-Platform Rewrite**

Write a prompt that takes a single announcement and outputs platform-specific

content for **X, LinkedIn, Instagram, TikTok**, including hooks, CTAs, hashtag strategy, safety- worded claims, and **A/B copy variants** with predicted engagement rationale.

2. **Community Guidelines & Safety Pass**

Construct a prompt that generates social posts aligned with platform policies, with a built-in **self- moderation checklist** for defamation, privacy, misinformation, graphic content, and harassment risks.

3. **Social Posting Calendar (60 Days)**

Create a prompt that outputs a 60- day cross- platform content calendar with daily themes, posting windows, creative format cues, KPI targets, and a **learning loop** that adapts next week's plan based on performance.

4. **Trend Narrative Mapping**

Design a prompt that analyzes a trending hashtag for narrative arcs, influencer typologies, sentiment polarization, meme formats, and counter- narratives, ending with **engagement stances** and landmines to avoid.

5. **Message Testing & Iteration Loop**

Write a prompt that proposes three messaging hypotheses, generates test posts per platform, defines success metrics, and includes a **re- prompt loop** using hypothetical results to refine messaging.

6. **Crisis Backlash Simulation (Social)**

Create a prompt that simulates a social media backlash around a brand incident, producing real- time **triage responses**, escalation rules, community replies, and a **24- hour war room schedule**.

---

## C) Image Building & Personal Branding

1. **Brand Positioning Blueprint**

Design a prompt that outputs a personal brand positioning document: archetype, audience segments, value pillars, credibility proofs, signature themes, and **1- line elevator pitches** for media/investors/community.

2. **90- Day Visibility Plan**

Write a prompt that generates a 90- day visibility strategy for a public figure including messaging pillars, content series ideas, owned/earned/shared media mix, **thought- leadership topics**, and KPIs.

3. **Reputation Repair Roadmap**

Create a prompt that ingests sample negative comments/posts and outputs sentiment clusters, misconception map, prioritized risks, and a **30- day repair plan** with content cadence and measurement framework.

4. **Cross- Cultural Persona Adaptation**

Design a prompt that adapts the same personal announcement for **South Asia**,

**Europe, and the Middle East**, adjusting tone, sensitivities, compliance notes, and local media angles—plus a cultural risk checklist.

5. **Media Training Role- Play**

Write a prompt where the model acts as an **adversarial journalist**, conducting a mock interview with 10 probing questions, real-time bridging advice, and a post-session **gap analysis**.

6. **Proof Asset Curation**

Create a prompt that inventories a public figure's available proof assets (awards, data, testimonials, case studies), identifies **credibility gaps**, and recommends high-impact assets to produce next.

---

## D) Media Content Analysis & Monitoring

1. **Fact-Claim Extraction with JSON Schema**

Draft a prompt that extracts **all verifiable claims** from an article into a standardized **JSON schema** (claim, evidence, source type, risk level, verification steps, confidence).

2. **Comparative Outlet Framing**

Create a prompt that compares how three outlets cover the same event—identifying **angle differences, omitted contexts, source diversity**, and implications for audience perception.

3. **Misinformation Pattern Detection**

Design a prompt that scans a set of social posts for **mis/disinformation signals** (false dichotomies, cherry-picking, fabricated authorities), flags them, and proposes **neutral corrections**.

4. **Narrative Timeline Synthesizer**

Write a prompt that converts multiple reports and posts into a **chronological timeline** with certainty labels, actors, triggers, escalations, and **remaining unknowns**.

5. **Sentiment + Topic Co-Occurrence**

Create a prompt that qualitatively clusters comments by sentiment × topic, surfaces top pain points, and recommends **targeted content responses**.

6. **Ethical Risk Audit for Media Assets**

Draft a prompt that audits a proposed multimedia package (photos/videos) for **privacy, minors, trauma, graphic content, consent** and outputs mitigation actions and alternative storytelling options.

---

## E) Public Relations & Crisis Communications

### 1. **Crisis Triage Pack (Multi- Output)**

Design a prompt that generates: situation analysis (facts/speculation), stakeholder heat map (power × sentiment), 150- word holding statement, 10 “do not say” pitfalls, and a **24- hour comms timeline** with approval chain. Include a **red- team critique**.

### 2. **Message House + Stakeholder Matrix**

Write a prompt that produces a **message house** (core narrative, pillars, proof points, soundbites) and a **stakeholder influence matrix** (power, interest, concerns, preferred channels), with risk- adjusted variants.

### 3. **Press Release Generator with Compliance**

Create a prompt that drafts a press release (inverted pyramid) with quotes, boilerplate, fact sheet, and a **compliance/safety pass** for claims, legal, and privacy— plus embargo language and media contact block.

### 4. **Media Q&A Briefing Kit**

Design a prompt that generates anticipated journalist questions (friendly, neutral, hostile), approved key answers, bridging phrases, and a **refusal policy** for sensitive or unverified topics.

### 5. **PR Campaign Measurement Framework**

Write a prompt that creates a measurement plan mapping **objectives → metrics → data sources → reporting cadence → decision rules**, including leading and lagging indicators and a post- mortem template.

### 6. **Integrated Media Kit Builder**

Create a prompt that builds a **complete media kit** from a short description: press release, spokesperson bio, FAQ, fact sheet, media Q&A, image captions with alt- text. Require a final **ethical/accuracy checklist** before release.

---

## Pro Tips for Students (use these inside your prompts)

- **Role & Context:** “You are a senior editor following AP style...” / “You are a crisis PR lead...”
- **Inputs & Constraints:** Specify inputs (transcripts, posts), tone, word limits, regions, sensitivity rules.
- **Structured Output:** Request headings or a **JSON/YAML schema** for consistency.
- **Self- Critique & Red- Team:** Add a pass to find bias, risky claims, compliance and ethics issues.
- **Guardrails:** Include checks for defamation, privacy, copyrighted material, unverified allegations.
- **Iteration:** Embed an improvement loop: “Refine based on these metrics/feedback.”
